### **DETAILED ACTION**

1. The response filed 12/6/2004 has been received and made of record.
2. Applicant's arguments filled on 12/6/2004 with respect claims 1, 9-11 and 19-23 have been fully considered but they are moot in view of new ground of rejection.

### ***Allowable Subject Matter***

3. Claims 2 and 12 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 24-30 are allowed.

### **Claim Rejections - 35 USC § 102**

5. The following is a quotation of the 35 U.S.C. 102 that form the basis for the rejections under this section made in this action:

A person shall be entitled to a patent unless--  
(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 3718 of this title before the invention thereof by the applicant for patent.

6. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2157

7. Claims 1, 9-11 and 19-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Pothapragada et al., U.S. Patent No. 6,389,432[hereinafter Pothapragada].

As per claim 1, 11, and 21, Pothapragada disclose a method comprising:

- receiving on a first client (SAN-1 Manager 100) a message (i.e., request) from a server (server A) addressed to said client (the manager being operable to receive a request for storage space from a requester, the request specifying one or more criteria associated with the requested storage space) (see col. 2, lines 39-53 and col. 35-45);
- controlling management of data storage by said client based on information included in said message (see col. 2, lines 39-53 and col. 35-45);

In considering claims 9 and 10, Pothapragada discloses a method including receiving a message including an identifier, which specifies a task, to perform on a storage device (see fig. 5 and col. 8, lines 9-28).

In considering claims 19 and 20, Pothapragada discloses a system including receiving a message including an identifier, which specifies a task, to perform on a storage device (see fig. 5 and col. 8, lines 9-28).

In considering claims 22 and 23, Pothapragada disclose a system, wherein said storage stores instructions that enable the device to compare group identifier in a message to determine whether the device is within a group addressed by said server (see col. 2, lines 39-53 and col. 35-45);
